NETLOGIX RECOGNISED AT 2015 AUT EXCELLENCE IN BUSINESS SUPPORT AWARDS

L-R: Paul Warner (Fuji Xerox), Mark Rogers (Netlogix), Chinthaka Abeywickrama (Netlogix), Professor Geoff Perry (Dean, AUT Faculty of Business & Law)

30 October 2015: Netlogix has won the Fuji Xerox Business \$20M Plus Turnover Award at the 2015 AUT Excellence in Business Support Awards. The Awards were celebrated with a gala dinner at the Langham Hotel, Auckland on 29 October, attended by more than 600 business leaders and members of the business community.

The Awards are the only national performance measure for New Zealand organisations that provide business support. Applications are judged by evaluators from the AUT Business School with oversight from the New Zealand Business Excellence Foundation.

“Netlogix has achieved remarkable success through a collaborative approach to freight logistics provision. Founded on the principles of transparency and collaboration, the firm looks to find common ground in the objectives of freight owners, freight carriers and other industry stakeholders. Developed with large foundation customer, in just two and a half years Netlogix has effectively leveraged technology to rationalise the freight market. It has responded to industry needs with supply chain solutions, client feedback, and rapid response times, targeting customers through market gaps from the very beginning. This company has a clear strategic direction based on customer needs,” said category evaluator and AUT Business School lecturer Danaë Anderson.

“Netlogix is delighted and proud to receive such a prestigious award in recognition of the efforts and tireless contribution of our staff, our carrier partners and our other stakeholders including in particular our valued and supportive customers “said Netlogix CEO Chinthaka Abeywickrama

“We are especially grateful to our foundation customer Lodestar who believed in our approach and provided us with the opportunity to prove what we could achieve through a collaborative approach to managing freight logistics across its supply chain.”

AUT Dean of Business and Law, Professor Geoff Perry said: “These Awards are important to AUT because they allow us to recognise the best providers of business support in New Zealand. Business support organisations and individuals make a significant but often unseen contribution to the performance of businesses, helping behind the scenes with everything from dispute resolution, research and legal services to security, compliance and logistics. This celebration of the business support sector is a great opportunity for the AUT Business and Law Schools to join with the business community and celebrate excellence.”
